

# A Question of Geography

| Landscapes of the UK   |  |   |  |   |   |  |
|--|--|---|--|---|---|--|
| Use your revision guide and geography classwork book to help you answer these questions              |  |   |  |   |   |  |
| <b>1<sup>st</sup></b><br>Describe the location of upland areas                                       | <b>2<sup>nd</sup></b><br>Describe the location of lowland areas  | <b>3<sup>rd</sup></b><br>Describe the characteristics of an upland area   | <b>4<sup>th</sup></b><br>Describe the characteristics of a lowland area  | <b>5<sup>th</sup></b><br>Describe how glaciers can shape the land through erosion                                       | <b>6<sup>th</sup></b><br>Identify the three different types of rock and give an example of each | <b>7<sup>th</sup></b><br>How does geology affect the landscape of a place?                                 |
| <b>8<sup>th</sup></b><br>How does freeze-thaw affect a landscape?                                    | <b>9<sup>th</sup></b><br>State two ways humans can impact on an environment                                    | <b>10<sup>th</sup></b><br>Describe the three processes of weathering  | <b>11<sup>th</sup></b><br>Describe the process of mass movement  | <b>12<sup>th</sup></b><br>Describe the four types of erosion and how they work to change the land                       | <b>13<sup>th</sup></b><br>Identify the four types of transportation and how they move material  | <b>14<sup>th</sup></b><br>Define the term deposition   |
| <b>15<sup>th</sup></b><br>Describe the formation of a gorge  | <b>16<sup>th</sup></b><br>Describe the formation of a meander and oxbow lake                                   | <b>17<sup>th</sup></b><br>Describe the geomorphic processes that operate in the upper course of a river you have studied            | <b>18<sup>th</sup></b><br>Describe the geomorphic processes that operate in the middle course of a river that you have studied | <b>19<sup>th</sup></b><br>Explain how the rivers flow for a river you have studied has been affected by human activity  | <b>20<sup>th</sup></b><br>Describe the process of longshore drift                               | <b>21<sup>st</sup></b><br>Explain the formation of a coastal landform caused by erosion (cave, arches etc) |
| <b>22<sup>nd</sup></b><br>Explain the formation of a coastal landform caused by deposition (beaches) | <b>23<sup>rd</sup></b><br>For a stretch of coastline that you have studied explain how erosion is effecting it | <b>24<sup>th</sup></b><br>Explain how different groups of people who use the coastline may have conflicting views on how it is used | <b>25<sup>th</sup></b><br>Identify four types of sea defence and describe how they protect the coastline                       | <b>26<sup>th</sup></b><br>Describe the four management options that are available for a coastline that you have studied | <b>27<sup>th</sup></b><br>Describe the difference between a natural and human landscape         | <b>28<sup>th</sup></b><br>Describe the location a coastal landscape you have studied                       |
| <b>29<sup>th</sup></b><br>Describe the location of a river you have studied                          |  | <b>30<sup>th</sup></b><br>Explain the formation of a coastal landform caused by deposition (spits)                                  |  | <b>31<sup>st</sup></b><br><b>BONUS Q:</b> Explain the formation of a coastal landform caused by deposition (bay)        |   |  |
